

SUNRISE W4000 / W4700

Truck and bus rollover wash

Rollover wash systems for buses, coaches, rigid trucks, vans and trailers. The gantry travels on fixed rails at 400 cm gauge, under PLC control with a manual option. The W4700 is the taller machine.

Water shields add 14 cm to each side of the machine width. Throughput in vehicles per hour is not published for either model. It depends on the wash programme and the vehicle, and it is confirmed at proforma stage.

420 / 470 cm

Washing height
W4000 / W4700

285 cm

Washing width
Both models

Specification

Measurement	Unit	W4000	W4700
Maximum washing height	cm	420	470
Maximum washing width	cm	285	285
Machine width, excluding water shields	cm	465	465
Machine height	cm	510	560
Rail gauge	cm	400	400
Power installed	kW	6 / 20	5.3 / 9
Power installed, optional equipment	kW	50 / 75	50 / 75
Voltage	V	380	380
Frequency	Hz	50	50
